

KAURI WOOD CREATIONS at Purves & Purves

Riva1920 has been making furniture in Italy for almost 100 years. Beginning in 1920, the Company's ethos of quality cabinet making with natural materials and great attention to detail still continues to combine with an eye for contemporary furniture design to create an ever expanding, stunning collection.

Kauri Wood – the lord of the forest

This is the oldest wood in the world preserved for thousands of years in the wetland bogs of New Zealand. Once unearthed, dried and sawn, Riva1920 retains as much of the natural character in these boards, and with magical effect creates tables of outstanding design and quality.

The remarkable EARTH table with Kauri wood and clear resin bonds. A truly unique dining/centre table to make a significant statement.
